MasterCard gaat betalen kunstmatige intelligentie

Gepubliceerd: 30 november 2016 11:33
Laatste update: 30 november 2016 18:44

Creditcardbedrijf MasterCard gaat kunstmatige intelligentie verifiëren

Met de kunstmatige intelligentie wordt de betaling weggefilterd, terwijl legitieme betalingen wel worden geaccepteerd.

De kunstmatige intelligentie kan bijvoorbeeld worden gebruikt om te detecteren of een betaling verdacht is.

Op het moment krijgt een computer al of niet betalingen goedgekeurd.

Artificial Intelligence

EVERYTHING is a Recommendation

The screenshot shows the Netflix homepage for a user named Michael. The top navigation bar includes links for 'Watch Instantly', 'Just for Kids', 'Taste Profile', and 'DVDs'. A search bar contains the text 'Movies, TV shows, actors, directors, genres'. Below the navigation bar, the 'Recently Watched' section displays a row of five posters: 'BETTER OFF TED', 'ARCHER', 'MAD MEN', 'DOCTOR WHO', and 'ARRESTED DEVELOPMENT'. The 'My List' section, which is highlighted, shows a row of posters for 'COMEDY BANG BANG', 'SUPERNATURAL', 'SPACED', 'DR. HORRIBLE'S', 'ALPHAS', and 'FIREFLY'. A detailed card for 'Alphas' is shown, featuring a description: 'A team of individuals gifted with extraordinary neurological abilities is tasked with solving a series of high-profile crimes. Among them are an autistic man whose mind works as fast as a computer and an FBI agent with super strength.' It also lists the starring actors (David Strathairn, Ryan Cartwright) and creators (Zak Penn, Michael Karmow). Below the 'My List' section, the 'Top 10 for Michael' section displays a row of posters for 'COMEDY BANG BANG', 'SUPERNATURAL', 'SPACED', 'DR. HORRIBLE'S', 'ALPHAS', and 'FIREFLY'. The 'Popular on Netflix' section at the bottom shows a row of posters for 'New Girl', 'BOB'S BURGERS', 'FIREFLY', and 'FRASIER'.

NETFLIX

The screenshot shows a news article from The Huffington Post titled 'Facebook To Introduce New Photo Feature'. The article is dated 08/21/2013 1:44 pm EDT and updated on 08/22/2013 8:31 am EDT. It is written by Dino Grandoni. The article features a large image of a person's hand interacting with a large, glowing, translucent sphere, which is likely a representation of the new photo feature. The article is part of a collection of tech-related news, including 'Tech', 'TEDWeekends', 'CES 2013', 'Social Media', 'Women In Tech', 'Tech Videos', and 'Influencers And Innovation'.

Netflix's New 'My List' Feature Knows You Better Than You Know Yourself (Because Algorithms)

How to get started

Getting started

APIs for pretrained models Build your own

- Google Cloud ML Engine
 - IBM Bluemix
 - Microsoft Azure ML
 - Apple Core ML
 - and more ...
1. Learn python
 2. Install python notebook
 3. Try the online guides

Machine learning libraries

- Tensorflow (TFLearn, Keras)
- Torch (Lua)
- Theano (Python)
- Deeplearning4j (Java)
- Caffe2 (Python)

Data analysis

- Frame the problem (what do you want to solve?)
- Look at the bigger picture
(what happens before and after this?)
- Check assumptions
- Visualize!

Future

**“There is a tiny rubber thing that is
the same colour as the large cylinder;
what shape is it?”**

Resources – online framework

- Google Cloud ML: <https://cloud.google.com/ml-engine/>
- IBM Bluemix: <https://console.ng.bluemix.net/>
- Microsoft Azure ML:
<https://azure.microsoft.com/en-us/services/machine-learning/>
- Apple Core ML: <https://developer.apple.com/documentation/coreml>

Resources – build your own

Libraries:

Tensorflow: <https://www.tensorflow.org>

Pyhon: <https://docs.python.org/3/>
