Who am I

- Jeroen van Megchelen
- 37 years old
- Behind computer from age 12
- CEO of Ledger Leopard company / CTO Tagologic
- Can't sleep from blockchain
- 4 years experience
- Team of 70 Blockchain dedicated blockchain developers

Ledger Leopard

Ledger Leopard is an international company that provides a **blockchain platform** for developers and companies.

Our platform

The ledger leopard platform is an **API** based solution based on **Ethereum**, which makes it easy for developers and companies to work with the added values of Blockchain technology without having to start **from scratch**.

Our team

We have an international team of **70 developers** from all over the world that are working daily to optimize our platform.

Not only technology

Our blockchain was checked by the **Dutch national lawyer** and the **TuDelft** university
